

Dr. Mark Peterson is an Assistant Professor at the University of Michigan, Department of Physical Medicine and Rehabilitation, and a faculty member in the UM Neuroscience Graduate Program, Global REACH, Institute for Health Policy and Innovation, and the Michigan Institutes for Data Science. Mark has 2 federally funded projects to study cellular and morphological muscle pathophysiology and metabolic dysregulation among adults with neurodevelopmental disabilities (cerebral palsy), and to examine the effectiveness of targeted behavioral interventions in this population. Mark has published over 70 peer review papers and book chapters on the topics of exercise physiology and muscle strength for enhancing metabolic health, improving functional capacity, increasing life-expectancy, and optimizing athletic performance. He is a Fellow of the American College of Sports Medicine (ACSM), and is certified with distinction, as a strength and conditioning specialist through the National Strength and Conditioning Association (NSCA).
